

# CAREER LADDER

## About CareerLadder

We are excited to share with you that the New Americans Task Force CareerLadder project has been selected as a finalist in the Google.org Impact Challenge! **CareerLadder connects skilled immigrants and refugees to career pathways, digital resources, and a professional network while fostering economic opportunity and restoring dignity through work.** CareerLadder tools include:

- Pathway guides in the fields of engineering, law, nursing, accounting, and education providing step-by-step instructions for how skilled immigrants and refugees can pursue re-entering their former careers in Nebraska
- Digital skills training including resume development, email etiquette, internet safety, Google G-Suite tools training, and more
- A leadership development program for immigrants and refugees that fosters civic engagement, empowers participants to engage with local institutions, and develops greater social capital
- A short-term, accelerated mentorship program that connects skilled immigrant professionals with established professionals in their field for networking and connections

The tools developed by CareerLadder are applicable statewide and will be shared by partner agencies with communities across Nebraska.

**In the next phase of the Challenge, we have the opportunity to nearly double our funding if we are selected as the community's favorite nonprofit. We need your help in generating as many votes as possible!** By sharing information about CareerLadder through email and social media with partner organizations, supporters, and followers, you can help the New Americans Task Force generate as many votes as possible for CareerLadder. Your support will allow us to provide substantially more services to skilled immigrant professionals across the state of Nebraska!
